Filed to: Erase Android • Proven solutions You can delete data from your android phone temporarily or permanently. When you delete permanently, it means that you are done with that data and will not require using it anymore. Choosing to have your data deleted permanently from an android phone is for the simple reason that it is useless and has no value anymore. You will not be requiring it in the coming days thus it will be better when out of your possession completely. But, you should only delete permanently when you are 100% sure that the data will not be required again. Have you been wondering how you can delete data from your android phone permanently and in a secure manner? Well, this article will teach you how to do that and at the same time ensuring that your important data is not affected. Use the following simple steps: Step 1. When you have opened your android device, locate the "settings" icon and click it to open "storage". That will give you access to the data that you want to delete. Step 2. When you scroll down, you will locate the "erase SD card" option to click and immediately there will be a message warning that you are about to lose your data. That message should give you a pointer that you are doing the right thing. Step 3. Since you want to delete the data, tap on the "erase SD card" icon for the process to begin. There are some SD cards that have passwords and you must enter your PIN to continue deleting. Step 4. Within seconds or minutes, all your data will be deleted. Some people are able to recover data after the SD card has been formatted but you should protect yours against that by "layering". This will entail filling up the space with other material and delete repeatedly. Your data will be gone completely. Tips: What should you do in case of deleting data on android accidentally? Even when you want to delete some data completely, there is that which you are not about to let go. You should not get too much concerned in case you delete certain data accidentally. There is still the option of recovering before it is lost permanently. One of the precautions to have is ceasing to use the device after losing your important data. The more you add data to the device, the more the deleted data will be pushed out. So, stop using the device and install a data recovery program to help you recover the data. Part 2: The Best Solution to Completely Delete Data from Android Those people who have used dr.fone - Android Data Eraser in the past to erase their data on Android devices can attest to how it is a viable program. This software can erase ALL of the data on your Android phones or tablets, and no tool can recover the erased data any more. It can work on every Android devices. All of the photos, contacts, messages, videos, music, app, app data and more will be totally deleted. Best Tool to Thoroughly Erase Data on Android Powerful scanning ability. Removes all of the unnecessary junk files and background processes for Android users. Erases your device completely. Erases backup and deleted data completely as well. Frees space up and speeds your smart phone up. 4,290,481 people have downloaded it How to erase all of the data on Android devices with dr.fone Step 1 Download and Launch Please start with downloading and launching the dr.fone on your computer and select the "Erase" section from the application menu below. Step 2 Begin to wipe your android phone/tablet device permanently Move on to hit the "Start" button as shown below to begin erasing all the data on your android phones or tablets irrevocably. Step 3 Perform factory reset on Android In the end, to erase all settings on your android phone or tablet, you need to tap " Factory data reset" on android device when a pop-up message is sent to you. Conclusion dr.fone - Android Data Eraser is a feasible and safe software to help you completely get rid of useless data from your Android devices. Sofonic reviews SHEIN-Fashion Shopping Online, or simply SHEIN, is a free shopping mobile app that allows you to easily buy clothing items online. Developed by ZOETOP BUSINESS CO., LIMITED, this lifestyle app focuses on women's fashion but also offers products under men's clothing, children's clothing, shoes, and accessories. Similar to Zara, SHEIN features direct ordering and purchasing of fashion items. It also offers discounts, free shipping for a certain price threshold, sales, and more. It performs well enough compared to other fashion apps but some of its shipping policies can be a turnoff for more avid online shoppers. Is SHEIN a legit company? SHEIN is one of the many digital retailers you can find online that sells cheap and affordable products. It's a legitimate e-commerce service that has a few physical stores—although these are just pop-up stores and not permanent locations. The reason why its prices are so low is that its manufacturing is centered around high production output. Thus, expect most of its products to be of decent to low quality. Nevertheless, these products usually do look like how they're advertised, so if you're interested in good-looking clothing that's cheap, then you can try out SHEIN. It has both a proper website and a mobile app for convenient on-the-go access. Using the app, you can save more using its discounts, Flash Deals, and free shipping for orders over a certain price. It will also alert you of sales and promotions. Ordering is safe through this platform as your payment is secure—whether via PayPal or credit card. You also get the option to pay later using its Afterpay feature and its four interest-free payment methods. Additionally, you can contact its 24/7 live chat customer service for any issues—which is helpful since you'll sometimes receive defective items. Another annoying thing is applied coupons affecting an order's eligibility for free shipping. A money-saver All in all, SHEIN is a great alternative if you're looking for a fashion retailer that offers thousands of choices for a low price. While its quality isn't the best and you'll probably encounter manufacturing errors every now and then, they do actually look like how you first saw them on the app and you can easily save more on them. It could use some more flexible shipping policies, though. Several days ago, I got a new Samsung Galaxy S6 from my brother as a birthday present. But I lost it when I went to the cinema. Luckily, I have set Android Device Manager with my Google account on that phone. Can I get back my Samsung phone? A friend consulted me how to get back her lost new android phone with Android Device Manager. I suppose that many android users probably encountered the same problem. Here, in this article, a detailed introduction of Android Device Manager, together with some good alternatives Android Device Manager, will be described. Now, have a good look at them. Android Device Manager 1 What is Android Device Manager Android Device Manager, also named as ADM, is a kind of device managing service designed for Android users by Google Inc. to control their android phone, tablet and other android devices via Google account. Its main function is to locate, ring, lock, and erase their android phone or tablet when they lost or misplaced it to make all data on the device safe and secure. 2 How to set up Android Device Manager on your Android device 1. Turn Android Device Manager on. Before using Android Device Manager, be sure that your Android phone is synced with your Google account and Android Device Manager is on. If not, try to do the following: Go to "Google Settings app" > "Security" > "Android Device Manager", and tap "Remotely locate this device", also activate "Allow remote lock and factory reset". 2. Turn location access on 3. Prepare to track your android device someday Google Android Device Manager also runs on tablets. By now, you have enabled Android Device Manager. Next, you can manage your Android devices as you need. 3 How to use Android Device Manager to track/lock phone We always hope that you will never use this Device Management on Android. However, unfortunately, when you have to use it to track Android phone one day, you can open Android Device Manager App on other phones, or through Android Device Manager website. Then follow the paragraphs below to find out where is your phone. Locate Android phone 1. Log into your Google Account. (Forgot Google password? Recover Google account easily here.) 2. Choose the exact device you are tracking. 3. The Android Manager will show you the approximate location of the device when the lost phone is online. 4. After locating your lost android, you can ring, lock, or wipe all your android phone data remotely to preserve your privacy. Ring lost phone Sometimes, you just misplaced your mobile and you cannot find it. So go to this Android Device Management, and click "Ring", causing your phone to ring for 5 minutes even if it is set on silent or vibrate. Lock Android phone When you are sure that you have lost your Android phone and want to remove all of your photos, contacts, videos, messages, app, etc on your phone or tablet, you can wipe your Android device remotely. Just click "Erase Device", like factory reset, and it will clear your phone. But the things on your SD card maybe not removed. 4 How to unlock Android Device Manager If you have found back your lost phone, you can unlock it by inputting the PIN password or pattern. However, if you are forgetful, or your phone was back after a long time, and you forgot the password or pattern, you still can unlock Android Device Manager to use your phone freely. For removing Android Device Manager lock, you need to meet the following rules: 1. ADM will have to be enabled on your phone before it is lost, stolen, etc. 2. The GPS option must be turned on in order to track your phone with the help of ADM. 3. The phone you are using with ADM has to be connected to the Internet or Wi-Fi. 4. Your phone must be running Android 4.4 and above. Now, let's show the process to unlock ADM. Step 1. Go to google.com/android/devicemanager on your computer or any other mobile phone. Sign in to your Google account enabled ADM. Step 2. In the ADM interface, choose the phone you want to unlock and then select "Lock". Step 3. Enter a temporary password and click on "Lock" again. Then you will see a confirmation with the buttons of Ring, Lock and Erase. Step 4. Input the temporary password to unlock your phone. Step 5. Visit your phone's lock screen settings and disable the temporary password. Now, Android Device Manager lock has been removed from your phone. 5 Alternatives to Android Device Manager If Android Device Manager location is unavailable, and cannot find your phone location history, you need to find its alternatives, here we recommend you some software to track your Android devices. Prey Prey is a phone-tracker application which runs silently in the background after you install it. It can track and trigger your lost phone, gather and deliver a picture of who is using it, or remotely lock down and erase everything on your lost device completely. More importantly, it supports almost all major devices, including Android phone or tablet, iOS device, Windows PC and Mac. Find My iPhone Find My iPhone is an app to track your iPhone, iPad or Mac. It was developed by Apple Inc. exclusively for Apple users. When your device goes missing, you need to lock down your device immediately and text a message to the lost device with a contact number by logging in to your iCloud. You can also use Activate Lock to protect your data from the wrong hands. Also, remote erase is available to you to wipe all your data on device when you cannot get it back. It is totally free to use. However, it only supports Apple products. Where's My Droid Where's My Droid is also a phone-track app to help you track and find your lost phone. It can help you locate your lost phone and ring it. It can adjust the ringtone volume up. And it can keep your phone battery consuming less after losing it. It has a free version with limited features. Just have a try. By now, everything about Android Device Manager is introduced. And we hope that it will bring you convenience to find your lost Android device. Conclusion This page mainly talks about Android Device Manager, definition and usage. You can easily set up Android Device Manager to help to track and find your lost phone location. Surely, if you do not want to use it, you can remove the lock easily with the step-by-step guide. Surely, Android Device Manager is not the only tool you can use to locate your lost phone, and you can find the replacement of ADM in the last part to track your lost phone. Have you grasp the whole usage of ADM? Let me know to leave your comments below. What do you think of this post? Excellent Rating: 4.8 / 5 (based on 175 votes)
